

Continuing education curriculum for ML

Nadia Udler - University of Connecticut (Stamford), email: nadiakap@optonline.net

- ❖ **It is intended for ML instructors at colleges in STEM, business, or business analytics concentration, and instructors in professional education.**
- ❖ **This curriculum is designed to introduce ML concepts without long-term commitment, only using high school math.**
- ❖ **This differentiates it from conventional approaches requiring significantly more effort and time before meaningful results can be achieved.**
- ❖ **The methodology and introductory projects are adopted from Operations Research.**
